

## COMPANY

TSC MANUFACTURING and SUPPLY, LLC is a leading worldwide manufacturer and distributor of fluid end expendables and mud pump spare parts for existing equipment, and new mud pumps of TSC design. These highly specialized parts are used throughout the oil well drilling, workover, water well drilling and mining industry.

Headquartered in the USA, Houston, Texas, coupled with extensive worldwide global locations, TSC is able to provide high quality products with expedient deliveries to our valued customers.

TSC's modern manufacturing facilities feature strict quality control processes which guarantee our products are produced to the highest industry standards, which include certification to ISO 9001 and API ISO/TS 29001 standards, and authorization to mark our equipment with API monogram.

Additionally, our extensive experience in research and development abilities and activities enables us to effectively manufacture existing products to even higher standards, which ensures that the products you receive consistently exceed OEM specifications, not just meet them.

When you require fluid end expendables or mud pump replacement parts, TSC's goal is to exceed our customers' expectations 24/7/365 with our superior customer service and the highest quality products at competitive prices.

You won't regret allowing us to service your organization. Remember...

**TSC** is your **Total Solution Company**

## INTRODUCTION

### LINERS

When it comes to mud pump fluid end expendable parts, TSC Manufacturing and Supply, LLC. has it all.

TSC mud pump liners are designed and manufactured to meet or exceed original equipment specification and API standards for almost all types of mud pumps in use today. With advanced technology, metallurgical control and rigid inspection, we offer unmatched performance and durability according to customer testimonies in the most severe drilling conditions, both triplex and duplex liners are available in a wide range of sizes.

### HIGH CHROME SLEEVE LINER

The outer hull, or body, of the liner is manufactured using high-strength forging. TSC uses forgings exclusively to ensure consistent quality. The sleeve is centrifugally cast in the TSC facilities by skilled craftsmen. It has the maximum amount of chrome for the base metal and TSC adds molybdenum to increase the hardness depth. The sleeve is then inserted into the hull at a tightness that exceeds its counterparts. The TSC liner is rated to match the pressure rating of the pump per liner size.

**TSC mud pump liners are unsurpassed in quality and reliability.**

#### Features

- Rated for all drilling operations.
- Bore hardness is 62-69 Rockwell.
- "HP" lip design to prevent inner sleeve slippage.
- Extremely long service life.

### CHROME-PLATED LINER

TSC chrome-plates the same outer hull in lieu of the sleeve to maximum thickness. The hulls are then machined and polished to a mirror finish.

TSC Manufacturing and Supply LLC, 13788 West Road, Suite 100, Houston, Texas 77041, USA

# INTRODUCTION

## ZIRCONIA CERAMIC LINER

TSC's zirconia liners offer lifetime cost savings, significantly longer service, better performance and safer operation than those made of more commonly used alumina ceramic.

In addition, TSC's zirconia liner is a proprietary Zirconium-based matrix that has significantly improved mechanical characteristics.

Zirconia has three important property advantages compared to alumina.

- Zirconia exhibits better impact strength.
- Zirconia is harder than alumina.
- Zirconia can be honed to finer surface finishes than alumina. Finished to 4 RMS, the zirconia liners provide a surface finish that is three to four times finer than alumina.

All three of these property advantages translate to lower ownership costs. The improved wear directly extends the service life of the sleeve, while the improved impact strength reduces significantly the costs of replacing broken liners in the field. The surface finish improvements, meanwhile, have an indirect effect. The finer surface finish means less friction with the elastomer-and-metal pump pistons, which in turn extends piston life and reduces pump-cooling requirements.

- Reduced liner and piston wear.
- Increased impact characteristics.
- Lower thermal load on the liner wash system.
- Higher thermal ratings.
- HP design with shoulder-on-hull to prevent sleeve slippage.
- ID tolerances of  $+.010"/-.000"$ .
- Surface finish of 4-8 RMS.
- Hardness is HV 0.3 kg/mm – 1100/1200 ( 92-94 Rc).
- Improved performance for high temperature applications.
- Liner sizes are available from 4"-8" for all popular mud pumps.

TSC Manufacturing and Supply LLC, 13788 West Road, Suite 100, Houston, Texas 77041, USA

## INTRODUCTION

### PISTONS

TSC offers a full range of mud pump pistons for both triplex and duplex pumps. They are:

- Bonded urethane pistons.
- Bonded rubber pistons.
- Replaceable rubber pistons.
- N'Durall premium bonded pistons.

### BONDED URETHANE PISTON

These pistons are constructed of double durometer urethane, bonded to a solid metal hub. Double durometer urethane is designed to provide optimum performance in oil-based mud and high drilling pressures.

#### Features

- Rated for all drilling operations.
- Maximum operating temperature is 180 °F.
- High pressure mud pump service.
- Extended service life.

TSC Manufacturing and Supply LLC, 13788 West Road, Suite 100, Houston, Texas 77041, USA  
Tel: +1 832 456 3900 Fax: +1 832 456 3998 E-mail: [sales@tscms.com](mailto:sales@tscms.com)

## INTRODUCTION

### N'DURALL PREMIUM BONDED PISTON

TSC's "N'durall" mud pump piston improves drilling contractor economics through advances in technology, improved process control and increased drilling penetration rates.

#### Chemistry

Manufactured from advanced polymer compounds, the advances in chemistry ultimately provide superior mechanical values and chemical resistance. The increased mechanical values provide resistance to reciprocating pump pistons biggest enemies listed below.

- Heat.
- Abrasion.
- Extrusion.

The advanced polymer compound provides strength to withstand chemical attack from additives used in today's oil, synthetic and water based drilling fluids. The compound also has improves abrasion resistance from drilling solids suspended in drilling muds and excels in high temperature performance capable of operating in fluid temperature up to 300°F.

#### Improved Process Control

The "N'durall" carries stamped batch numbers on the piston body for use in monitoring manufacturing dates and as an aid in rotating shelf stock.

#### Design

The single durometer design and open mold casting contribute to overall performance and improved economics.

#### Machining

CNC machining of steel piston heads yields close tolerances for improved performance.

#### Applications

- High Pressure Drilling.
- Elevated Mud Temperature.
- Synthetic Drilling Fluid.
- Ceramic and Zirconia Liners.
- Chrome Sleeved Liners.

TSC Manufacturing and Supply LLC, 13788 West Road, Suite 100, Houston, Texas 77041, USA  
Tel: +1 832 456 3900 Fax: +1 832 456 3998 E-mail: [sales@tscms.com](mailto:sales@tscms.com)

## INTRODUCTION

### BONDED RUBBER PISTON

TSC pistons are constructed of nitrile rubber bonded to a solid metal hub. The oil resistant rubber is designed to provide optimum performance in oil base or water base mud and high drilling pressures.

#### Features

- High tensile strength.
- Rated for all drilling operations.
- Maximum operating temperature is 250°F.
- Extended service life.

### REPLACEABLE RUBBER PISTON

TSC replaceable rubber pistons are made with nitrile rubber to resist extrusion and abrasion. These pistons are fully interchangeable with most other manufactures products. Available sizes range from 3" through 7-1/2" and series are A, B, K and L.

#### Features

- High tensile strength.
- Rated for all drilling operations.
- Maximum operating temperature is 250°F.
- Extended service life.

# INTRODUCTION

## PISTON RODS

TSC piston rods are made with premium-grade, heat-treated alloy steel. The rods offer excellent resistance to fatigue, corrosion and heavy loads. A full line of piston rods are available for various pumps.

### Features

- Fabricated with quality alloy steel.
- Numerically controlled machining.
- Long-lasting service life.
- Clamped and threaded.

## EXTENSION RODS

TSC extension rods are made from high-strength alloy steel, either heat treated or chrome plated. The rod offers excellent resistance to fatigue, corrosion and heavy loads. They are machined and polished to ensure a perfect seal for protection of the mud pump gear end.

### Features

- Fabricated with high quality steel.
- Numerically controlled machining.
- Long-lasting service life.
- Clamped and threaded.

TSC Manufacturing and Supply LLC, 13788 West Road, Suite 100, Houston, Texas 77041, USA  
Tel: +1 832 456 3900 Fax: +1 832 456 3998 E-mail: [sales@tscms.com](mailto:sales@tscms.com)

## INTRODUCTION

### VALVES AND SEATS

TSC offers a full range of valves and seats test to withstand the harshest service conditions. Available in Full Open, 3 Web design & 4 Web design valve and seat.

#### FULL OPEN VALVE AND SEAT

##### Features

- Forged alloy construction.
- Heat treated wear and guide surfaces.
- Precision machined and manufactured to API standards.
- Precision molded Urethane inserts.
- Rubber and specialized inserts available.
- Associated parts, springs, guides & pullers.

#### 3 WEB DESIGN / 4 WEB DESIGN VALVE AND SEAT

##### Features

- Heat treated premium alloy steel.
- Easy replacement of insert with a minimum of down time.
- Long-lasting service life.

TSC Manufacturing and Supply LLC, 13788 West Road, Suite 100, Houston, Texas 77041, USA  
Tel: +1 832 456 3900 Fax: +1 832 456 3998 E-mail: [sales@tscms.com](mailto:sales@tscms.com)

## INTRODUCTION

### FLUID END MODULES

Our high-strength, triple reduction, forged steel triplex fluid end modules are made from the highest alloy steel. Heat treated for long working life, they are machined to perfection and packaged for delivery with anticorrosion protection. The precision-made jewelry-like exterior finish reflects our superior quality.

#### Features

- Completely interchangeable with OEM.
- Premium-forged alloy steel.
- Made on CNC boring mills.
- Strict computer controlled heat treat procedures.
- Rigid inspection.
- Rated for all drilling operations up to 7,500 psi.

TSC Manufacturing and Supply LLC, 13788 West Road, Suite 100, Houston, Texas 77041, USA  
Tel: +1 832 456 3900 Fax: +1 832 456 3998 E-mail: [sales@tscms.com](mailto:sales@tscms.com)

## INTRODUCTION

### FLUID END ACCESSORIES

TSC's fluid end accessories are available for most of the popular triplex mud pumps. CNC machining renders these accessories uniformly dimensional and interchangeable with OEM. The perfect exterior surface reflects our superior quality.

#### Associated items

- Valve and cylinder head plug.
- Valve and cylinder head thread ring.
- Valve and cylinder head lock.
- Valve guide.
- Stud and nut.
- Specialty items.

TSC Manufacturing and Supply LLC, 13788 West Road, Suite 100, Houston, Texas 77041, USA  
Tel: +1 832 456 3900 Fax: +1 832 456 3998 E-mail: [sales@tscms.com](mailto:sales@tscms.com)

## INTRODUCTION

### RUBBER & ELASTOMER PRODUCTS

- Extension rod seals.
- Valve guide bushings.
- Manifold O-ring.
- Baffle splash guards.

- Valve cover & cylinder head seals.
- Liner gaskets, wear plate gaskets.

Gaskets / Seals marked with an (\*) indicate that various elastomers may be available. Common offerings are –U for Urethane or –RF for Rubber/Fabric. Please check with your sales associate for detailed offerings.

## INTRODUCTION

### PULSATION DAMPENERS

TSC offers a broad range of drilling and production spherical pulsation dampeners. Volumetric size range from 10 gallon to 20 gallon capacities and pressure range from 3000 psi to 7500 psi. The body of the TSC spherical pulsation dampeners is manufactured from a one piece steel forging, thereby eliminating the possibility of weld fatigue failure.

The one piece spherical design allows for high efficiency in a small volume and does not require addition structural support. The spherical design also offers much more piping flexibility than appendage style dampeners. Our proven stabilizer supported bladders offer superior life and reaction time in the most demanding applications.

#### RANGE AND CONNECTION SIZE

Type	Volume (Gal)	Pressure (psi)	Weight (Lbs)	Dimensions(inch)			
				A	B	C	D

# INTRODUCTION

## PULSATION DAMPENERS

### FEATURES

- Single piece forged body (with no circumferential welds), results in a stronger body and smoother inside surface.
- Inside surface machined to facilitate diaphragm movement.
- Field-replaceable top and bottom plates.
- Bottom plate connection to suit customer application.
- Diaphragms available in various materials to suit application requirements.
- Diaphragm equipped with stabilizer plate to eliminate folding and trapping of fluids, resulting in enhanced life.
- Nitrile (NBR), Hydrogenated Nitrile (HNBR), and Urethane diaphragms standard.
- Diaphragms can be replaced without removing the unit from the line.

## INTRODUCTION

### MUD PUMP 7,500 PSI FLUID END UPGRADE KIT

TSC Manufacturing and Supply LLC, 13788 West Road, Suite 100, Houston, Texas 77041, USA  
Tel: +1 832 456 3900 Fax: +1 832 456 3998 E-mail: [sales@tscms.com](mailto:sales@tscms.com)

## Pulsation Dampener

- Popular Hydril Interchangeable Style
- One Piece Forged Body
- Domestic Elastomer Products
- Nitrile (NBR), Hydrogenated Nitrile (HNBR), and Urethane Diaphragm Options to Match Customer Application Requirements
- Field- Replaceable Top and Bottom Plates
- Pressure tested to 1.5 Time of MAWP 7500 PSI
- ASME Coded Design Available

## Discharge Strainer Cross

- 5-Way or 6-Way Configurations
- Adapters for Pressure Gauge and Relief Valve
- Pressure Test to 1.5 Time of MAWP 7,500 PSI
- Various Flange Sizes as Required
- Custom Design per Customer's Requirements

## Suction Manifolds

- Precisely – Controlled
- Welding Jig for Better Fit

## Available Mud Pump Models

- BOMCO F1600 - Southwest Style
- EMSCO FC1600
- GARDNER DENVER PZ11
- HH F1600 - Southwest Style
- NATIONAL 12P160
- TSC WF1300

## Discharge Manifolds

- Forged Steel Construction
- Heat Treated and Ultrasonic Non-Destructive Examination
- Hydrostatic Tested to 1.5 Time of MAWP 7,500 PSI
- Different Designs Available

## Fluid End Modules

- OEM Interchangeable
- Pressure Test to 1.5 Time of MAWP 7,500 PSI
- Made from High Strength, Low Alloy Material
- Valve-Over-Valve or 2- Piece L-Shape Designs
- Quenched and Tempered for Longer Fatigue Life

- Localized Service through a Global Network
- Maintenance / Repair Service
- Alignment, Clearance & Tolerance Adjustments
- Internal Repair/Replacement Service
- Closed Circuit Pressure Testing
- API 7K, Q1 & ISO 9001 Certified
- World Class R&D Team
- Fully Stocked Local Inventories
- Wholly-owned Manufacturing Facilities
- Global Quality System
- Worldwide Immediate Parts Support
- Mature Global Supply Network
